

A/QM-01/N° 0001

**ACIMAC QUALITY MARK**  
**The mark that guarantees**  
**the high quality and reliability of our products.**

The technologies and products offered by our company enjoy a leading position in the ceramic machinery and equipment sector.

We are therefore pleased to inform you that to further improve the quality of our offerings, on 01/07/2005 we obtained the **Acimac Quality Mark certification for the following products RE-ENTERING PUNCH MOULDS-MIRROR MOULDS-TRANSFER MOULDS**

The Acimac Quality Mark is a voluntary product quality mark promoted by ACIMAC (Italian Ceramic Plant and Machinery Manufacturers' Association). It guarantees a number of important characteristics for the above-listed products, including:

- Specific aspects of product safety
- Specific product characteristics
- A longer warranty period than normally granted with other products
- A clear commitment from our company regarding the supply of spare parts for purchased products
- A rapid and high-quality after-sales service for purchased products.

These characteristics are guaranteed by the independent certification body **TÜV Italia** (a member of the TÜV Süddeutschland group, a leading international organisation that operates in more than 60 countries) **through a certification procedure that guarantees the utmost impartiality and transparency.**

**Our products bearing the Acimac Quality Mark therefore offer CERTIFIED QUALITY from many different points of view, setting them apart from other technologies currently available on the market.**

For an overview of the contents and guarantees offered by products bearing the Acimac Quality Mark, visit the official website [www.qualitymark.acimac.it](http://www.qualitymark.acimac.it). We can also send you further documentation explaining the many advantages deriving from the purchase of technologies granted this certification.
